Create a home away from home with a few essentials that can help make... by Sue (Birmingham,Alabama, USA) Bought my washer at Sears, after much searching for the perfect washer for me. I've had it about 5 years, it was to replace another kenmore product that had seen much better days.The machine was delivered on time, that was a change. They were careful not to damage the washer or anything else, nice not to have to worry about that.Why did I pick this model? 2 reasons, one it's a front load, and they do a much better job of washing clothes, second they use WAY less water to wash the same clothes! 15 gallons per load instead of the 45 for a top load! The water savings alone made this machine worth the investment!I would HIGHLY recommend this machine, and have several times! I do 2 loads a week and it fits ALL the dirty clothes. My water bill dropped \$10 a month just by using it. I extra high spin makes your clothes almost dry before they go in the dryer, so you save wear and tear on it too, not to mention the cost of power for running drying for extended time because your clothes are still dripping wet! Expert review by : Consumer Guide (howstuffworks.com) Our Best Buy for the Steam washer category, Kenmore's HE3t Steam Front-Load Washer 46742/46752 lacks a few of the bells and whistles of the Kenmore HE5t, but saves you almost \$200 when compared to the top-of-the-line model. Even better, Sears regularly... Offers steam for removal of oily and grimy stains, large capacity, automated water levels, water and energy efficient Cost is high, electronic controls are more prone to repair than simple dials HI @kw457jhr. I can't find the exact information regarding the capacity of your model washer so here's a link that shows how to calculate it. Note: I've restored your deleted comments and deleted the duplicated ones. Sometimes the Ifixit spam iRobot gets it wrong and deletes comments/answers/questions which have long number strings for the model number, as it thinks that it is a spam phone number. By reopening your comments it "teaches" the iRobot so it knows better next time. Moderator. You can use a pressure washer to clean nearly anything outside in a fraction of the time it would take you otherwise. However, before you start dreaming about your next cleaning project, learn more about how to choose a unit, what you need and how to use a pressure washer.Types of Pressure WashersWhen you're shopping for pressure washers, you'll find two basic types: electric and gas. Electric pressure washers, which you power by plugging them into an outlet. That can limit where you use the pressure washer. Additionally, while they can be powerful, electric pressure washers are typically best for cleaning smaller items, including grills, patios and bicycles. People often like these types of pressure washers because they're quiet, lightweight, portable and low maintenance.Gas pressure washers require that you buy gas or oil to power the machine. However, that also gives you the freedom to go just about anywhere with it. Although gas pressure washers are heavier than electric ones, they usually have wheels to help you maneuver them. Additionally, they require regular maintenance, but they're more powerful and last longer than electric models.How Pressure Washers WorkNo matter whether you choose an electric or a gas-powered pressure washer, the machine works pretty much the same way. The motor or engine operates a pump. That pump pressurizes water from the hose up to 1,000 pounds or more before forcing it through the spray wand. The higher the pressure the washer puts out, the stronger its cleaning power. The pressure is measured in pounds per square inch (psi). While many of the smaller washers come with one adjustable nozzle that lets you switch from a single stream to a fan-shaped spray. Larger units may come with different nozzles, including some that rotate, create wider or narrower patterns and turbo-charge the stream.What Not to Pressure WashPressure washers are effective in removing flaking paint, stuck-on grime, mold, algae, mud and more. Using a pressure washer on surfaces like patios, decks, driveways, masonry, siding and brick is perfectly safe. However, some materials can't hold up to the powerful pressure. Examples include: Asphalt roofs: Using a pressure washer on your asphalt roof destroys it by removing the granules Antique items: Vary old furnishings, old decking and antique buildings could all have dry rot or soft spots that your pressure washer will likely damage Stained wood: Pressure washing stained wood surfaces will remove the stain from the wood, requiring you to re-stain it after it dries Tips for Pressure WashingGetting started is a matter of powering up the machine and hooking it up to your garden hose and tightening all the connections to prevent air from getting into the lines. Tips for using your pressure washer include: Wash vertical surfaces like siding from the bottom up, then rinse from the top down Use the lowest pressure nozzle with the broadest spray pattern to avoid damaging the surface you're cleaning Avoid spraying into outlets, vents or air conditioning units Pressure Washer TroubleshootingAlways keep your pressure washer repair manual after buying one. Not only will it offer helpful tips for operating it safely, but it also will give you information like the model number, which you might need to get pressure washer repair parts. It also helps to keep pressure washer spare parts around for small fixes. For example, if you're having trouble starting it, you might need to replace the spark plug or clear out the fuel tank to remove debris before refueling.In many instances, you might not need parts. Instead, you might need to check things out. For example, if your pressure washer is leaking, check the O-rings and water seals, but it might be as simple as loose fittings, which are the most common cause of leaks. If you're having pressure problems, make sure your garden hose is the right size and is free of any kinks or leaks. MORE FROM QUESTIONSANSWERED.NET ? 3 Answers from these members: HI Matt, your washing machine has a capacity of 4.3 cu ft and you dryer has 7.3 cu ft capacity. I encourage you to visit www.searspartsdirect.com. You can find lots of useful information there by entering your model number. You can view owner's manuals, parts, troubleshooting, and more.Have you considered adding a free personal shopper to assist you with all of your shopping needs?
